Profile Summary

Product execution professional combining **engineering depth, business understanding, and AI-assisted product development**. Designed and independently developed two end-to-end digital product case studies across fintech payments and urban mobility, with live interactive prototypes.

Experienced in **PRD development, KPI design, UAT coordination, and cross-functional delivery**. Well-suited for product roles at the intersection of fintech, digital platforms, and AI-driven execution.

Core Competencies

- **Product:** PRDs, User Stories, MVP Definition, Feature Prioritization, Roadmapping, Backlog Management
- **Execution:** Agile/Scrum, Sprint Planning, UAT, Requirement Gathering, Stakeholder Alignment
- **Analytics:** KPI Design, Funnel Analysis, SLA Tracking, Data Interpretation (Excel, Power BI)
- **AI in Product:** AI-assisted research, prototyping, and documentation workflows
- **Tools:** Figma, Jira, Notion, Power BI, Excel, GitHub
- **Domains:** Fintech / Payments, Digital Platforms, SaaS, Marketplace Systems

Product Builds

BANGLAPAY — Digital Payments Ecosystem [\[View Project Link\]](#)

- Identified interoperability and transaction-reliability gaps across Bangladesh's digital payment ecosystem through structured research and competitor analysis.
- Authored a full PRD covering transaction flows, settlement logic, multi-stakeholder interactions, and failure-handling mechanisms.
- Developed UI flows and an interactive prototype demonstrating end-to-end user journeys.
- Built and deployed a product documentation site independently using AI-assisted workflows.
- Defined key metrics: transaction success rate, settlement latency, and system efficiency.
- Evaluated potential business impact including transaction volume growth, interoperability expansion, and monetization opportunities.

PROYAN — Urban Mobility Marketplace System [\[View Project Link\]](#)

- Identified supply-demand imbalance in urban mobility through behavioral analysis and competitor mapping.
- Produced a complete PRD including user journeys, MVP scope, feature prioritization, and scalability considerations.
- Developed UI flows and a clickable prototype to simulate real-world usage scenarios.
- Defined KPIs: ETA accuracy, supply coverage, and user adoption.
- Modeled scalability and potential revenue opportunities based on demand patterns.

Professional Experience

Management Trainee Officer — Product Quality Operations & Analytics

Oct 2021 – Feb 2023

Bengal Group of Industries

- Translated business and operational requirements into structured workflows and system-level improvements across internal platforms.
- Identified high-impact process gaps through data analysis, contributing to a **61% reduction in return and replacement volume**.
- Defined and monitored **10+ KPIs** including SLA adherence, delays, and quality metrics.
- Led requirement gathering, UAT coordination, and implementation validation across cross-functional teams.
- Delivered structured reports and insights supporting decision-making and continuous process optimization.

Education

Master of Business Administration (MBA)

North South University, Bangladesh

Ongoing

B.Sc. in Electrical & Electronic Engineering (EEE)

Islamic University of Technology (IUT), Gazipur

CGPA: 3.07 / 4.00

Certifications

- **Google Project Management Professional Certificate** – Agile, Sprint, Backlog Risk & Delivery Management
- **Product Management Career Program — HDNB** – PRDs, User Stories, Product Analytics, UX Fundamentals

Leadership & Recognition

Team Lead — IUT Avijatrik Mars Rover Project

2020 – 2021

- Led a **50+ member cross-functional engineering team** across mechanical, electrical, and software domains.
- Improved rover operational efficiency by **30%** through automation and system optimization.
- Reduced system failure rate by **25%** through core system redesign and reliability improvements.
- Applied Agile methods (sprints, backlog prioritization, iterative delivery) for structured execution.
- Ensured cross-functional alignment for integrated subsystem delivery.
- Contributed to COVID-19 ventilator initiative under constrained environments.

Vice-Chair – IEEE RAS Student Branch

- Increased engagement by 25% through technical programs and initiatives.
- Managed stakeholder communication and external partnerships.

Achievements

- International Mars Hackathon (2020) — 16th globally (1st among Bangladeshi teams)
- Indian Rover Design Challenge (2020) — 17th place
- European Rover Challenge (2019) — 15th globally (1st among Bangladeshi & Asian teams)
- Indian Rover Challenge (2018) — 5th place
- European Rover Challenge (2018) — 14th globally (1st among Bangladeshi teams)
